Are you and your device ready to go back to school?

Do you have a device that you would like to use for classroom purposes? Here is a quick guide to some apps you and your parents might want to have installed by the first day of school. These apps are my suggestions but you may choose one that suits you best. (In each case I have tried to provide an IOS as well as an Android equivalent of the App if there is no equivalent then the app is multi-platform.)

-Bookmark or add a quick link to your "Start Up Screen" that connects to the class website. This link is located just off the school website. (Homework site)

- Bookmark or add a quick link to your "Start Up Screen" that connects to Nova Scotia Provincial Moodle Site. (Document Storage) The link to "The Moodle" is http://nsvs.ednet.ns.ca/nsps/login/index.php

- Word processor (Pages, Kingsoft Office or Microsoft Word)
- PDF editor (TypeOnPDF or Claro)
- Presentation or slideshow software (Keynote, Prezi or PowerPoint)
- Video editor (iMovie or Magisto)
- Explain Everything
- Poster maker (Pic Collage)
- Thought-web maker (SimpleMinds)
- QR scanner
- Text reader (iBooks or Amazon Kindle Software (This works on Blackberry too))
- Dictionary/thesaurus. These are online resources so just create a link to them (dictionary.com or WordReference)
- Calculator
- SumDog
- Edmodo

Looking forward to seeing you in September!
